

Century's New Resource for Proper Building Valuations

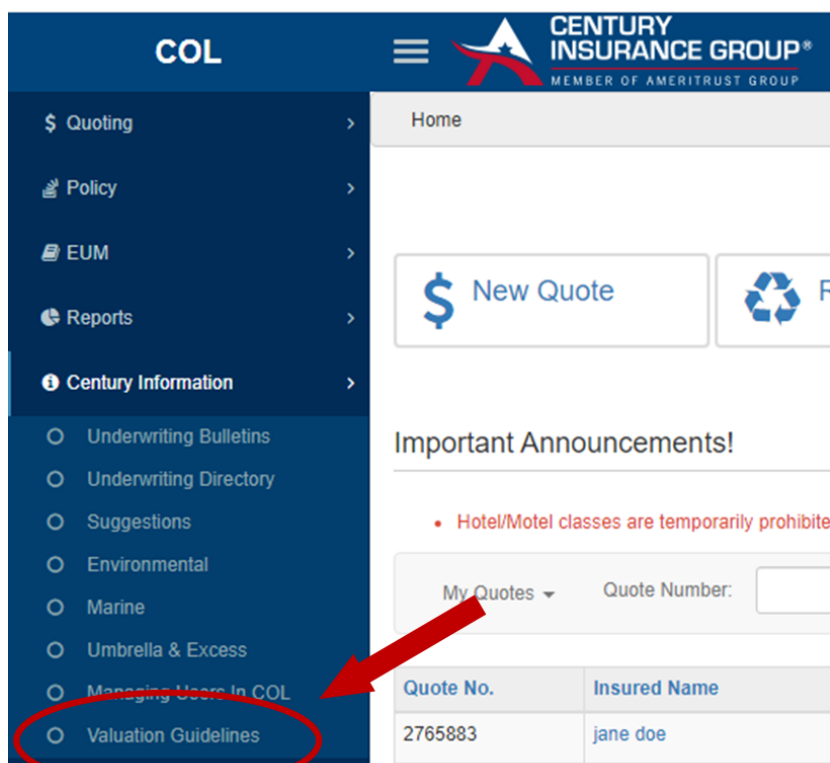

Adequate Insurance to Value (ITV) is critical to providing insureds with proper limits and avoiding a coinsurance penalties.

The insured and the retail agent are responsible for ensuring appropriate limits are requested. Still, agency producers and carrier underwriters should verify requested limits are appropriate.

To assist you, Century has created valuation guidelines which provides generally acceptable replacement cost per square foot ranges and other considerations, including **proper use of Actual Cash Value (ACV) and Replacement Cost (RC).**

The valuation guidelines can be found in COL in the left menu bar under "Century Information" (see below) or click on the link below to review and reach out to your Century underwriter with any questions!

Thank you for your efforts and valued partnership!
